## **Launch of “Tranquillo” – CPU Cooler**

4 Heatpipes CPU Cooler compatible to AMD and Intel’s 775, 1366 and latest 1156 socket

**HONG KONG, 03 November, 2009**

Thermal Solutions specialist *GELID Solutions* unveils its multi-compatible CPU Cooler “*Tranquillo*” of its *SILENT* product line.

The mainstream tower CPU Cooler “*Tranquillo*” uses 4 power heat pipes and a special heat pipe constellation to achieve best heat transfer from CPU core to the aluminium fins in its class. After precise software simulation and calculation during the development stage a unique heat sink shape was created to lower air flow resistance as much as possible.

A silent 120mm fan with the intelligent GELID PWM (Pulse Width Module) control has been chosen to make this heat sink more valuable. The fan blades were optimised to guarantee high airflow while running silently. The intelligent GELID PWM curve keeps the fan silent when no necessary cooling is needed and accelerates the fan speed whenever additional cooling is needed. The multi-award winning high performance GC-2 thermal compound is already included in the package. Additionally mounting clips for AMD 754/ 939/ 940/ AM2/ AM2+ and for Intel 775, 1366 and latest 1156 sockets as same as back plates for Intel LGA 775, Core i5 and Core i7 boards are all included. The cooler is RoHS and WEEE conform and carries a 5 year warranty.

*“The Tranquillo can cool any CPU from either AMD or Intel’s latest Core i7 and Core i5 while maintaining low noise levels and at a great price. It’s a great product for power users looking to upgrade their existing cooler for overclocking but also for the silent enthusiast interested in keeping noise to a minimum without having to install expensive liquid based cooling solutions,”* said Gebhard Scherrer co-founder and Sales Director of GELID Solutions Ltd.

**The “Tranquillo” CPU cooler is available now and has a MSRP of USD 38 or Euro 28.**
